

STANDARD COUNTERWEIGHT FEATURES

INTERCONNECTING SHAPE – specifically designed to restrict movement in any direction when stacked

STUD RECESS – Timber stud logically orientated on the strong axis for enhanced hoarding stability, while also doubling as the support post recess for fencing configurations

PATENTED METAL PLATES, cleverly support the pine stud or fencing support post, and secures them in place

EASY TO CARRY HANDLES

SUPPORT POST readily inserts into post holes to create a high fulcrum point offering enhanced stability

SUPPORTS CROSS BRACING so the hoarding won't 'snake' out of position once installed
